TERMITE ATTRACTANT™

WARNINGS

- Store in a cool place, away from food, feedstuffs.
- Keep out of reach of children, uninformed persons and animals.
- Not for human or animal consumption.

PRECAUTIONS

- Wash hands with soap and water after handling.
- Destroy empty container by perforation or flattening and never use for any other purpose.
- Prevent contamination of food, feedstuffs, drinking water and eating utensils.

DIRECTIONS FOR USE

Use only as directed.

FOCUS TERMITE ATTRACTANT is a granular attractant used in combination with EXTERRA In-ground Stations as part of the EXTERRA Termite Interception and Baiting System, an integrated system for the management of subterranean wood destroying termite infestations. **FOCUS TERMITE ATTRACTANT** is invaded by soil micro-organisms which produce carbon dioxide, a proven termite attractant.

Application in combination with EXTERRA In-ground Stations: Pour **FOCUS TERMITE ATTRACTANT** granules into the bottom of the hole prior to In-ground Station placement at a rate of 1½ scoops. Ensure granules contact moist soil. If necessary moisten soil with water.

Apply to all new installations of the In-ground Station and also to existing Stations that have not shown termite activity. Apply once per annum or as necessary.

1 jar treats approximately 110 EXTERRA In-ground Stations.

For full particulars on installing the **EXTERRA termite Interception and Baiting System**, refer **EXTERRA termite Interception and Baiting System - Procedures manual**.

WAARSKUWINGS

- Berg in 'n koel plek weg van voedsel en voer.
- Hou buite die bereik van kinders, oningeligte persone en diere.
- Nie vir menslike of dierlike gebruik nie.

VOORSORGMATREËLS

- Was hande met seep en water na hantering.
- Vernietig leë houers deur gate daarin te maak of plat te slaan en moet nie vir geen ander doel gebruik nie.
- Voorkom besoedeling van voedsel, voer, drinkwater en eetgerei.

GEBRUIKSAANWYSINGS

Gebruik slegs soos aangedui.

FOCUS TERMITE ATTRACTANT is 'n korrellokaas wat saam met EXTERRA In-ground Stations as 'n deel van die EXTERRA Termite Interception and Baiting System, 'n geïntegreerde sisteem vir die bestuur van ondergrondse houtvretende termietinfestasies, gebruik word. **FOCUS TERMITE ATTRACTANT** word deur mikro-organismes in grond ingeval wat koolsuurgas, 'n bewese aanlokker van termiete, produseer word.

Toediening saam met EXTERRA® In-ground Stations:

Plaas **FOCUS TERMITE ATTRACTANT** korrels op die bodem van die gat voor die plasing van die In-Ground Station teen 1½ skeppe.

Dra sorg dat die korrels in aanraking met vogtige grond is.

Indien nodig benat die grond in gat met water.

Dien toe aan alle nuwe installasies van die In-ground Station en ook aan bestaande stasies wat geen termietaktiwiteit toon nie.

Dien een keer per jaar of soos nodig, toe

1 uur behandel ongeveer 110 EXTERRA In-ground Stations.

Vir volle besonderhede vir die installering van die **EXTERRA Termite Interception and Baiting System**, lees die **EXTERRA Termite Interception and Baiting System - Procedures Manual**.
